## **Family Assessment**

The Family Assessment is designed to identify your family's strengths, needs, and goals. We will first gather some basic information about you and your children, and then work with you to identify to assess your family's needs. Together we will identify goals for rehousing your family and supporting your wellbeing.

The Assessment is divided into the three sections. Each section asks for some basic information to better understand your unique life experiences.

It can often take a few meetings to feel comfortable with new people and answer personal questions. We will work at your pace. Most people finish the assessment over three meetings within the first two weeks after entering the program.

Using this information, we will work together to develop a Family Goal plan. This plan identifies the steps for you to build a safe and stable home, and financial independence through budgeting, employment or education. There is also a section that focuses on your health and well-being as a parent, and for your children's needs. All members of the family matter and we are here to ensure that parents and children get their needs met.

Your team is here to help you obtain a safe place to live, and to support you in feeling stronger and healthier so that you can live the life you want for your family.

Let's Begin!

**Part I: Identifying information.**

**Part II: Housing & Self-Sufficiency.**

**Part III: Family Functioning.**
